

# Diameter Reducing Machines Expert

## SJ-32 Anchor diameter reducing machine

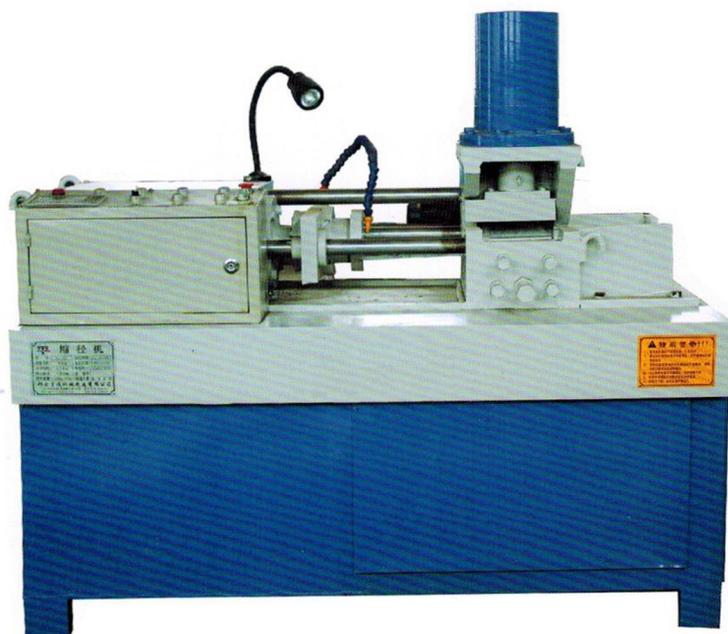

Product Features: This machine is a special equipment for processing the reduction for the diameter of the bolt head of the mine. It has the advantages of simple operation and fast speed, and is the first choice for the mine support industry

Project	Parameters
Reduce range	12-30mm
Reduce rate	≤2mm
Hydraulic Motor	11kw
Dimensions	1800x900x1150mm
Reduce length	10-250mm
After reducing extension length	10%-15%
Cooling motor	0.04kw
Weight	1000kg±50kg

## SJ-32 Diameter reducing machine

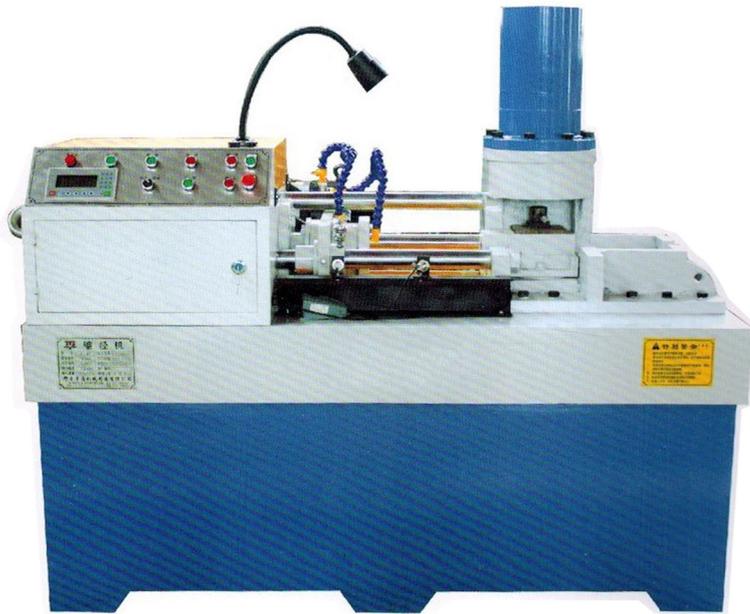

Product Features: This machine is a non-cutting, processing equipment. It uses hydraulic technology to send round steel, rebar and other parts that need to be reduced in diameter into a special mold and cold-formed. Tensile strength,

Project	Parameters
Reduce range	12-30mm
Reduce rate	≤2mm
Hydraulic Motor	11kw
Dimensions	1800x900x1150mm
Reduce length	10-250mm
After reducing extension length	10%-15%
Cooling motor	0.04kw
Weight	1000kg±50kg

## SJ-42 Diameter reducing machine

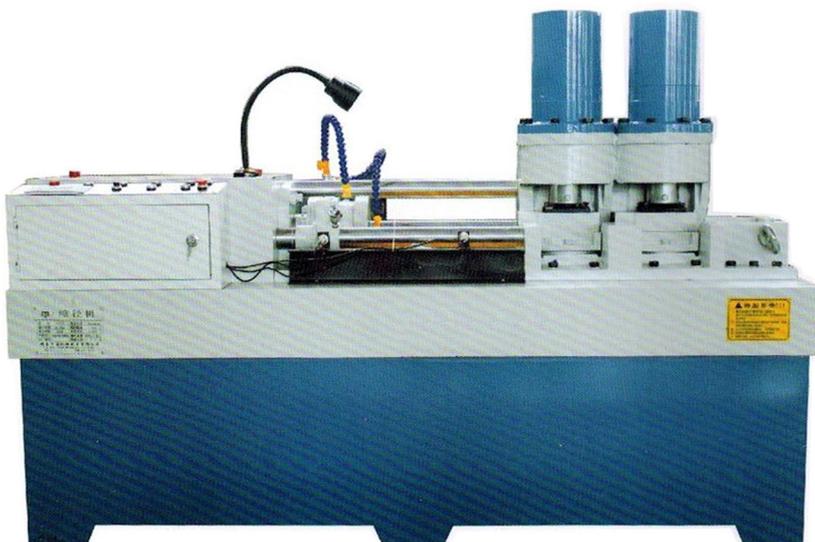

Product Features: This machine is a non-cutting machine with fast processing speed and accurate dimensions. It is an ideal equipment for processing mine anchors and corner bolts.

Project	Parameters
Necking range	12-42mm
Necking rate	≤2mm
Hydraulic Motor	18.5kw
Dimensions	1800x1220x1600mm
Necking length	10-300mm
After necking extension length	10%-15%
Cooling motor	0.09kw
Weight	2500kg ±50kg
Gas station size	1100*900*1100mm

## SJ-50 Diameter reducing machine

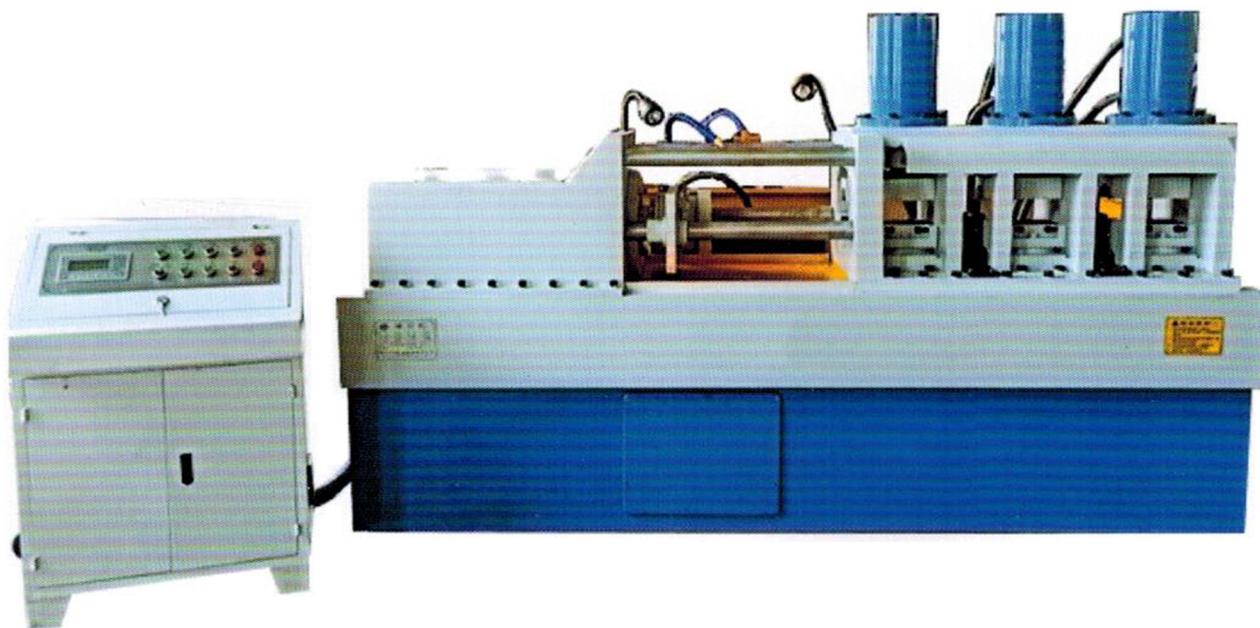

Product Features: This machine is a non-cutting machine with fast processing speed and accurate dimensions. It is an ideal equipment for processing mine anchors and corner bolts.

Project	Parameters
Necking range	12-50mm
Necking rate	≤3.5mm
Hydraulic Motor	22kw
Dimensions	2500x900x1600mm
Necking length	10-400mm
After necking extension length	10%-15%
Cooling motor	0.09kw
Weight	3000kg ±50kg
Gas station size	1100*900*1100mm

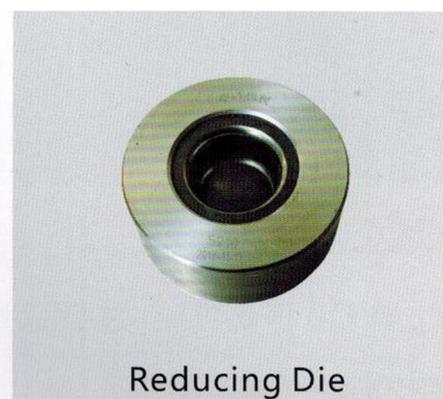

## SJ-65 Diameter reducing machine

Product Features: This machine is a non-cutting machine with fast processing speed and accurate dimensions. It is an ideal equipment for processing mine anchors and corner bolts.

Project	Parameters	project	Parameters
Necking range	12-64mm	Necking length	10-450mm
Necking rate	≤4mm	After necking extension length	10%-15%
Hydraulic Motor	30kw	Cooling motor	0.125kw
Dimensions	2900x1500x1750mm	Weight	4500kg ±50kg
Gas station size	800*500*1250mm
